### In the Name of God

Persian translation ...

Computer software can be divided into two very broad categories - systems software and applications software. The former is often simply referred to as 'systems'. These, when brought into internal memory, direct the computer to perform tasks. The latter may be provided along with the hardware by a system supplier as part of a computer product designed to answer a specific need in certain areas. These complete hardware/software products are called turnkey systems.

Smart cards store vital information such as health records, drivers' licenses, bank balances and so on. Smart phones, cars and appliances with built in computers can be programmed to better meet individual needs.

A smart house has a built-in monitoring system that can turn lights on and off, open and close windows, operate the oven and more.

- 1- **Devices such as card readers and keyboards attached to the CPU are called:**  
a) storage devices      b) primary devices      c) secondary memory      d) peripheral devices
- 2- **"Magnetic tapes" and "magnetic disks" are examples of .....**  
a) secondary storage      b) storage devices      c) primary memory      c) programs
- 3- **Which of the following is NOT a good description for a computer?**  
a) single purpose      b) versatile      c) infinite      d) multifunction
- 4- **Computers nowadays are much ..... compared to the past.**  
a) more boring      b) more expensive      c) more compact      d) bigger
- 5- **Which of the following is NOT true?**  
a) Computers used to be thought of as large adding machines  
b) Computers can respond to an infinite number of instructions  
c) Computers have created new areas of work  
d) Computers process pieces of information
- 6- **A system is a combination of parts forming a .....**  
a) part      b) mixture      c) whole      d) computer
- 7- **The various devices which are known as computers are referred to as .....**  
a) hardware      b) software      c) systems      d). peripherals
- 8- **It is the ..... that controls the activities of computer hardware.**  
a) computer      b) peripherals      c) applications      d) software
- 9- **Which of the following is TRUE?**  
a) The processor is directly attached to the CPU  
b) The central processing unit is a kind of peripheral  
c) Carelessly chosen parts can result in a slow computer  
d) Software refers to the physical parts of a computer system
- 10- **Which of the following is NOT a peripheral?**  
a) printer      b) card reader      c) CPU      d. secondary memory

11- Which of the following is NOT true?

- a) Computer systems can be discussed in terms of hardware and software
- b) One of the functions of software is to guide the processing of information
- c) "Computer" refers only to the internal memory in which data is stored
- d) Systems software and applications software are not the same

12- Computers work on various data .....

- a) electronically
- b) specially
- c) randomly
- d) basically

13- The information which is given to a computer to be processed is known as .....

- a) processor
- b) output
- c) memory
- d) input

14- In a clothing factory, the stage where the pieces of cloth are sewn together is similar to the ..... stage of a computer.

- a) storage
- b) input
- c) processing
- d) output

15- The processor of a computer is also referred to as .....

- a) RAM
- b) CPU
- c) centerpiece
- d) PC

16- The physical, electronic and electromechanical parts which form a computer are called:

- a) software
- b) central processing unit
- c) hardware
- d) peripheral devices

17- The information which is needed by a computer to solve a problem is called----

- a) program
- b) output
- c) signal
- d) data

18- Which of the following cannot be controlled by a microcomputer?

- a) robots
- b) humans' minds
- c) aircraft navigation systems
- d) medical instruments

19- All of the following are different kinds of input devices EXCEPT

- a) card reader
- b) tape drive
- c) printer
- d) disk drive

20- Which of the following decisions can a computer make?

- a)  $X > Y$
- b)  $X + Y$
- c)  $X < Y$
- d) all of the items

21- A computer can only work according to the ---- given to it.

- a) instructions
- b) cores
- c) input devices
- d) media

22- Which of the following is NOT true?

- a) A computer can make thousands of logical decisions
- b) A computer can get tired and bored after some time
- c) A computer is faster than a human
- d) A computer is limited by the minds of humans

23- Match the following words with their meanings or synonyms.

- |               |                              |
|---------------|------------------------------|
| 1. appealing  | a) weak in health or in body |
| 2. celebrated | b) modify                    |
| 3. vital      | c) attractive or interesting |
| 4. frail      | d) current                   |
| 5. alter      | e) adapt                     |
| 6. anticipate | f) predict                   |
| 7. conform    | g) indispensable             |
|               | h) acclaimed                 |

\* Good luck \*
